A dedicated and enthusiastic Computer Science student from GLA University, Mathura with a passion for learning and exploring new technologies. Committed to building a strong foundation in the field of computer science through continuous improvement, practical application, and academic excellence. Seeking opportunities to contribute positively to innovative and impactful technological solutions.

SKILLS

Languages : HTML , CSS , JavaScript , Python , Java .

Frameworks : Bootstrap.

Libraries : React.js .

Tools : Git , VS Code .

PROJECTS

STOCK-PREDICTION, HTML , CSS , JS , Streamlit

- Integrated real-time stock data fetching via APIs of **Yahoo Finance**.
- Implemented a machine learning model (**LSTM/Random Forest/KNN**) to predict stock prices based on historical market data.
- Provided interactive graphs and charts for **historical price trends** and prediction output Deployed the **ML model** on **Streamlit** to make it publicly accessible

TIMBLO - SkillSwap, HTML , CSS , JS , React.js

- Enabled users to **teach the skills they possess and learn the skills** they desire via a simple and interactive platform.
- Designed a clean and responsive user interface (UI) using **React.js**, ensuring a seamless user experience across devices.
- Deployed the **application on Vercel** to make it publicly accessible.

EDUCATION

BTech(Honrs.), GLA University

- Specialization in AI and Analytics

2024 – present
